## EDUCATION

### University of California, San Diego

Bachelor of Science in Computer Science

September 2024 - June 2026

GPA: 3.77

- Relevant Coursework: Advanced Data Structures, Sys Prog and Software Tools, Design & Analysis of Algorithms

### San Diego Miramar College

Associate of Science for Transfer in Computer Science

August 2022 - May 2024

GPA: 4.0

- Honors Student, Associated Student Government Senator, Engineering Club officer

## WORK EXPERIENCE

### Software Engineer Intern / Argus West Investigations

January 2025 - Present

- Streamlined **REST API** endpoints, implemented **CRUD** functionality, and managed database model migrations using **Django** to create a **Case Management System (CMS)**
- Refactored backend logic and wrote **unit tests** to improve maintainability and reduce execution times

### Software Engineer - AI Trainer / Alignerr

October 2024 - Present

- Annotated and labeled **300+ datasets**, ensuring high-quality training data to boost AI model accuracy
- Reviewed, analyzed, and debugged **200+ AI-generated code snippets**, identifying logical errors and providing corrective feedback to refine AI-driven development tools
- Collaborated with AI engineers to improve model performance by **20%**, identifying patterns in mislabeled or ambiguous data

### Full-Stack Developer / CSES

September 2024 - Present

- Built **20+** dynamic components and pages for a **React Native mobile app**, Triton Spend, an app for tracking finances
- Integrated **Google Authentication** for secure user login and **Node.js APIs** to handle transactions and data processing
- Used **AWS** for backend services and managed **PostgreSQL** as the database, ensuring scalability and efficient data storage
- Followed **CI/CD Pipeline**, utilizing **GitHub Actions** for automated testing and deployment

### Software Development Intern / Falkor

July 2024 - September 2024

- Designed **50+ reusable React Native components** for a full-stack social media application, enhancing UI consistency and user engagement
- Integrated **100+ Django REST APIs**, ensuring low-latency data retrieval and seamless client-server communication
- Implemented **lazy loading**, **pagination**, and **optimized API calls**, reducing frontend load time by **30%**

### Software Test Engineer Intern / Sun Tech

June 2021 - August 2021

- Conducted **600+ firmware tests** on company products, **automating Unit and Integration testing** for reliability
- Identified and documented software and hardware defects using **Jira**, facilitating efficient issue tracking and resolution

### Machine Learning Intern / STEM-Away

October 2020 - August 2021

- Built a **basic recommendation system** using **Pandas** and **Jupyter Notebook**, applying data analysis techniques to personalize user suggestions and improve user engagement
- Scraped, cleaned, and structured web data using **BeautifulSoup**, enhancing dataset quality for machine learning experiments

## PROJECTS

### Stock Educator - Diamond Hacks 2025

April 2025

- Developed an **AI-powered stock simulator** tool with **React**, **Node.js**, **Express.js**, and **PostgreSQL**
- Connected **real-time stock market data APIs**, providing insights to help users make informed trading decisions
- Generated quizzes on past stock market situations and validated with **Gemini AI** to automatically check user answers and provide instant, actionable feedback

### Quick Chat

May 2024 - July 2024

- Implemented **React**, **Node.js**, and **Socket.IO** for **real-time messaging**, ensuring seamless and instant communication
- Enhanced server performance by **30%** using **rate limiting**, **database indexing**, and **connection pooling**
- Designed a **scalable MySQL database schema** to manage users, channels, and messages efficiently

## TECHNICAL SKILLS

**Languages:** C++, C, Java, Python, HTML, CSS, JavaScript, Typescript, SQL, Assembly MIPS

**Libraries and Frameworks:** React, React Native, Angular, Django, Node.js, Express.js, PostgreSQL, MySQL

**Developer Tools:** Git, GitHub, Bitbucket, Jira, Docker, Postman, Swagger, AWS, Firebase
